

# Cal OES Daily Situation Report

## June 2, 2022

Starting 06/01/22, the 49 Palms Trail will be closed to allow bighorn sheep undisturbed access to the oasis water. Under current drought conditions, herds must rely on this water to survive. The closure will remain until summer monsoons increase water availability.

# Weather Key Points

Regional Operations Center

Western Region

Thursday, June 2

- Temperatures will see a gradual cooling trend into the weekend for many areas, though minor to locally moderate heat risk impacts will persist across mainly interior southern California where hot temperatures in excess of 100 degrees will persist
  - A warming trend is expected for many areas through much of next week
- Fire weather conditions will remain locally elevated through the weekend and into the middle of next week due to periods of gusty winds each afternoon and evening, particularly across southern California
  - The strongest gusts of 35 to locally 50 mph are expected Friday through Monday across the far southern Sierra and the Mojave Desert
  - Gusty conditions will even reach coastal areas at times
- A few isolated showers and thunderstorms are possible late Thursday afternoon and evening across far northern California, near the Oregon border. Much more widespread showers and occasional thunderstorms will arrive over more of northern California on Sunday, especially for areas north of Interstate 80.
  - A few storms could produce small hail and gusty winds
  - Rainfall amounts in excess of ½ inch are forecast in the mountains, with lighter amounts for the lower elevations and valleys. No significant runoff impacts are expected with this precipitation.
